# Developer resources

We have curated a set of developer tools that will make it easier for you to learn how to work with our APIs. These resources will help you build faster and test your applications before you deploy them to your users.

Learn more

```
# import package
import africastalking

# initialize SDK
username = "YOUR_USERNAME"

# Initialize a service e.g. airtime
airtime = africastalking.AIRTIME

# Use the service synchronously
response = airtime.send([
    {
        "phoneNumber": "+2547XXXXXXX",
        "amount": "KES 200"
    }
])

print(response)
```

## Airtime 101 - Sending Airtime

In this tutorial, we'll send our first bit of airtime with a simple script. Buckle up!

See sample code

# Transforming Customer Engagement through Voice

James Odede, a developer in Kenya built Voice Memo, a web application that allows you to build your own customer call center. Using Voice Memo, you can connect with customers using various channels including inbound, outbound Voice and SMS.

Using our fully featured Voice API, James has been able to build a platform that supports many businesses who are looking to enhance their customer engagement experience.
